A Message from the Nurse

Parents,

We are seeing an increase in strep throat cases at our school. We want to ensure the health and well-being of our students.

What is Strep Throat?

-Strep throat is a bacterial infection that causes a sore throat (although not always a symptom), fever, and sometimes a rash. It is spread through droplets in the air when someone coughs or sneezes.

-What Symptoms Should You Watch For?

Sore throat, especially if severe, headache, swollen tonsils/glands in the neck, stomach ache, rash. If your child has any of these symptoms, please contact your healthcare provider for diagnosis and treatment. Keep your child home if they are sick, encourage good hygiene practices, such as frequent handwashing. If your child is diagnosed with strep throat, please notify the school nurses. Students with a strep throat diagnosis should stay home at least for 24 hours after starting antibiotics. Strep throat is easily treated with antibiotics, untreated it can lead to serious complications. If you have any questions or

Parenting the ATYPICAL CHILD

Lessons for foster & adoptive parents
- Register Today!

What is this? This workshop is designed for weary foster and adoptive parents, facilitated by local therapist Amy Swigart and adoptive parent Liz Garcia. You will benefit from a wealth of knowledge that combines professional expertise and personal experience.

Why is this different? As parents of children who have faced rough starts in life, you understand the difficulties involved. You may feel alone, misunderstood, and frustrated when your efforts seem ineffective. In this **two part workshop** you will learn practical tools and get a greater understanding of the child (and behaviors) in your life.

Register
